PUBLIC SERVICE ANNOUNCEMENT

June 24, 2026

Paralytic Shellfish Toxin Advisory

The following advisories are for SEATOR sites with shellfish that have Paralytic Shellfish Toxins (PST) levels above the FDA regulatory limit of 80 µg/100 g. PSTs cause Paralytic Shellfish Poisoning (PSP). Consuming wild shellfish from these sites may result in an increased risk of PSP.

New Advisories

SEATOR sites with shellfish PST levels above the regulatory limit as reported in the Marine Biotoxin PST Report published on June 24, 2026.

Community	Beach	Species affected	Date Collected
Kake	Town Flats	Butter Clam	June 18, 2026
	Culture Camp/Pt. White Jr	Butter Clam	June 18, 2026
Klawock	Big Salt	All Species**	June 17, 2026
	City of Klawock Boat Launch	All Species**	June 17, 2026
Ketchikan	Seaport Beach	Cockle	June 16, 2026
	Herring Cove	All Species	June 10, 2026

**Initial testing did not return reportable values. Due to heightened risk of PSP an advisory is being put in place.

Active Advisories

SEATOR sites with shellfish PST levels above the regulatory limit collected between May 24, 2026 and June 23, 2026.

Community	Beach	Species affected	Date Collected
Ketchikan	Seaport Beach	All Species	June 16, 2026
	Settler's Cove	All Species	June 16, 2026
Juneau	Auke Rec/Pt. Louisa	Butter Clam	June 15, 2026
	Amalga Harbor	Butter Clam	June 15, 2026
Kasaan	Whale House Beach	All Species	June 15, 2026

Continued the next page

DISCLAIMER: There is always risk when consuming wild shellfish. Toxins cannot be cooked, cleaned, or frozen out of shellfish. Toxins can vary between regions, beaches, and shellfish species. Clean crab thoroughly and discard the gut contents since crab viscera and guts (butter) can contain high levels of toxins. Commercially available shellfish have been tested for PSTs and are considered safe for consumption.

Active Advisories continued

Community	Beach	Species affected	Date Collected
Haines	Portage Cove	All Species	June 09, 2026
	Taiyasanka Harbor	All Species	June 09, 2026
	Viking Cove	All Species	June 10, 2026
Skagway	Nahku Beach	All Species[+]	June 01, 2026

[+] Weight of organisms submitted for testing do not meet representative sampling criteria (<100g)

"All Species" includes all mussel and clam species (including geoduck), oysters, and any other invertebrate such as moon snails.

PSP Information

PSP symptoms include tingling in the lips and fingertips, numbing of the arms and legs, nausea, difficulty breathing, and even death. Anyone with these symptoms should seek immediate medical care or call **9-1-1**. To report PSP cases, contact the Alaska Department of Health and Social Services, Section of Epidemiology at (907) 269-8000, or (800) 478-0084 after hours.

SEATOR Information

The Southeast Alaska Tribal Ocean Research (SEATOR) network is comprised of 17 tribes in the Gulf of Alaska. SEATOR partners collect phytoplankton and shellfish samples from local beaches to track harmful algal blooms and marine biotoxin risk in their communities. Phytoplankton samples are analyzed by tribal environmental staff and shellfish samples are analyzed by the Sitka Tribe of Alaska Environmental Research Lab. These data are available at seator.org/data. Data is based on the best available sample collection efforts. The available species varies for each SEATOR site. Contact SEATOR with additional questions at (907) 966-9650 or seator@sitkatribe-nsn.gov.
